

## P29 Micro Food Penetration pH Probe

Following the success Sentek have enjoyed over the years with pH electrodes used in the food industry, it was decided to produce a new micro penetration probe for the measurements of cheese, fruit, fish, meat and meat products (such as ham).

**Recommended Applications:** Cheese, Fish, Food & Beverage, Fruit, Meat

### Specifications

pH Range	0 – 14
Cable Length	1 metre
Combination	Yes
Connector	BNC
Temperature Range	0 – 80°C
Lower Shaft Length	40mm ± 2mm
Lower Shaft Diameter	6mm
E O Point	0 to ±25mV
Junction Type	Frit Ceramic
Reference Type	Ag/AgCl, Liquid filled, Single Junction
Response Time	<30 secs 95% FSD
Shelf Life	12 months
Cleaning Solution	791-15
